

## 2015 Innovation Awards

### WET/DRY VACS

#### Cleva North America

The Vacmaster line includes a wall-mountable unit with a remote control power switch. Other features include high-performance motor technology, HEPA filter technology, quick-release detachable blower, soft-grip transport handle, and on-board accessory storage.

#### Shop-Vac

The patented Lock On Hose System with 180-degree flexibility at both hose ends and its CleanStream-Gore Hepa Cartridge Filter are among the multiple features and options available. Specialized kits, such as the VaccUFlex Attachment Kit, are also available.

#### Dustless Technologies

The 3-in-1 HEPA Vac gives contractors three ways to keep the jobsite clean: It is a certified HEPA vacuum for EPA's RRP and OSHA applications, it does not require removal of the filters for wet pickup, and it is a clean-air machine that captures airborne drywall dust.

### BATH VENTILATION FANS

#### Delta Products Corp.

The BreezSmart 150 CFM Fan with LED Light/Nightlight is virtually silent and is the highest CFM fan of its kind on the market. The BreezProfessional 200 CFM is powerful and quiet and is the first of its kind over 150 CFM on the market. Both are low energy and use DC motor technology.

#### Homewerks Worldwide, LLC

New Home NetWerks Bluetooth Bath Fan with LED light produces great bath fan performance with stereo speakers hidden for convenience, safety, and high-end aesthetics. Included is a waterproof remote for changing volume and songs while in the shower.

#### Broan-Nutone LLC

New vent fan with Sensonic stereo speakers delivers high-quality audio through most Bluetooth-enabled devices. The quiet fan plays any audio through its dual, high-fidelity speakers, blends with décor, prevents clutter on countertops and in storage spaces, and frees up bathroom outlets.

Powerful Performance | Innovative Design | Functional Organization

Cleva North America, Inc. is a proven leader in wet/dry vacuum innovation and technology. With more than 17 years' experience in engineering and motor technology, Cleva incorporates the latest processes and highest standards for engineering, design and production. The result is high-quality products with exceptional performance and durability that continues to exceed customers' and end users' expectations.
